

DISPOSAL SOLUTIONS FOR

Controlled Substances

We deliver peace of mind.

At Daniels Health, our mission to make healthcare safer elevates the standard of pharmaceutical waste management we bring to our customers, ensuring healthcare providers are equipped with solutions that prioritize safety, compliance and environmental responsibility.

For controlled substance disposal, Daniels' delivers an integrated product and service offering with the choice of two industry-trusted systems: Rx Destroyer and Secure a Drug. Each system has been designed to help healthcare facilities achieve non-retrievable disposal of controlled substances in line with DEA and EPA standards.

Neutralizing pharmaceuticals to an irretrievable standard, our drug deactivation solutions provide flexibility of use in any healthcare setting, while ensuring regulatory assurance and risk mitigation.

"Safe and responsible drug disposal isn't just about following the law, it's about doing the right thing for the environment, public health and the communities we serve."

Proper drug disposal is a critical safeguard in today's healthcare landscape. Beyond fulfilling compliance obligations, it plays a vital role in preventing drug diversion, protecting staff and patients and minimizing environmental harm.

The Science

Rx Destroyer™ and Secure a Drug™ products have been designed in partnership with pharmacists and clinicians and share the same powerful, science-based method of neutralizing controlled substances.

Both products leverage the proven chemistry of activated charcoal to achieve neutralization of controlled substances. Leaving them inert and irretrievable. This method is widely recognized for its effectiveness, safety, and alignment with regulatory disposal standards.

Controlled substance disposal is a critical part of a complete waste management system. At Daniels Health, our full service approach to waste management incorporates the Rx Destroyer or Secure a Drug product lines into an integrated approach that ensures safe and compliant disposal of all healthcare waste streams.

Secure a Drug

KEY FEATURES

- ▶ Simple to use with wide opening for safe multi-pill disposal.
- ▶ Solution available in a ready-to-use (wet) or dry formula (water added before initial use).
- ▶ In-built lid and secure locking mechanism seals container when full.

ACCESSORIES

- ▶ **Secure Mounting:** Manufactured with easy-to-clean steel, our locking brackets are designed to securely mount Secure a Drug products to a wall in a fixed position, eliminating the risk of unauthorized removal.
- ▶ **Static Lock Bracket:** Compatible with both the 2L and 4L container.
- ▶ **9L Wall Basket** with security cable.

AVAILABLE SIZES

SD2

- ▶ 2 Liters
- ▶ Comparable to: 0.5 Gallon

SD4

- ▶ 4 Liters
- ▶ Comparable to: 1 Gallon

SD9

- ▶ 9 Liters
- ▶ Comparable to: 2.5 Gallons

SD18

- ▶ 18 Liters
- ▶ Comparable to: 5 Gallons

SCIENTIFICALLY VALIDATED

Chemical Digestion process is supported by independent DEA labs and regulatory bodies for safe destruction of pharmaceuticals.

ENVIRONMENTALLY CONSCIOUS

Non-toxic formula reduces the risk of water system contamination.

HIGHLY EFFECTIVE

Compatible across controlled substance forms, including solid and liquid medications, and transdermal patches.

DEA & EPA COMPLIANT

Meets compliance requirements and recommendations.

SIMPLE & SCALABLE

Easy for healthcare staff and can be placed in any environment in your healthcare setting.

Both systems are designed to close the loop on controlled substance waste, ensuring safe handling, complete regulatory alignment, and a reduced environmental footprint. It's more than waste management, it's a cradle to grave commitment to safer care and a healthier planet.

Rx Destroyer

KEY FEATURES

- ▶ Ready to Use, no adding water or additional set up.
- ▶ Two formulas (All Purpose & Liquid) cater for the varying disposal needs of solid and liquid medications.
- ▶ Sizes to fit any environment, including at home disposal options.

ACCESSORIES

- ▶ **Secure Mounting:** Lockboxes and wall mounts which are made of medical grade steel. They provide an enhanced level of security with secure mounting and permanent placement.
- ▶ **Funnels:** Enable contactless use and maximum fill utilization.

COMMITTED TO COMBATING THE OPIOID CRISIS

As health professionals, we are keenly aware of the opioid crisis. The challenge is not a lack of attention to this epidemic, but rather, finding a solution and continuing education on how to spot and prevent drug abuse in the clinical environment. Keeping healthcare professionals at the forefront of our focus, we set out to design products for drug diversion prevention that were both simple for health professionals to integrate into their already busy schedules, and effective for opioid neutralization and disposal.

42% TO 72% of Opioids
prescribed for surgical use
remain unused and open to
diversion risk

“Reflecting on the system-wide rollout of Secure a Drug products across Advent Health, **I can’t imagine any way it could have gone better.**”
