▶ Waste originating from Laboratory or Research Facilities

Items that are defined as **pathological**

▶ Anatomical Organs

▶ Human or Animal Tissue / Biopsy Material

▶ Human or Animal Body Parts or Carcasses used for Research

▶ Surgical specimens.

PATHOLOGICAL WASTE CONTAINMENT

PATHOLOGICAL | *Pathological (or anatomical) waste is a classification of medical waste that could contain the presence of a pathogenic agent: any type of microorganism which could cause disease. While also contained in a red container, Pathological waste must be separated from regulated medical waste and labelled appropriately.*
